

Online Safety

Your safety is very important to us when you have your Residential sleep over.

If someone is taking pictures of you on their phones, i-pads, i-pods or any other electrical equipment and you don't want them to.

Tell someone.

You must not take pictures / video's of staff your friends or other young people at any time during your stay.

Remember when you play computer games and watch DVD's, you have to be the correct age according to the rating.

When you go onto the computer a member of staff will supervise you at all times. You can not access social networking site from Resi.

When you are calling texting or contacting your friends on your phone, or tablets ensure that you are being kind to them.

Never give out personal details. Including home address, email address, phone numbers or age. If anyone on-line asks you to keep secrets DON'T. If some one is saying unkind things to you or about you or taking pictures of you and you are not happy. Tell someone.
